

## Material Safety Data Sheet

1) **Identification of the substance**

BIO Paint Stripper

2) **Composition / information on ingredients**

Ingredients are either unclassified or below the concentration requiring declaration under the regulations.

Water	>50%
Surfactant	< 5%
Thickener	< 5%
Preservative	< 1%
Others	<50%

3) **Hazards identification**

Under normal conditions of handling and use this product should not pose any significant risks to health. The product, on prolonged contact, may have a defatting action on the skin.

4) **First aid measures**

Eyes: Wash with flowing water  
Skin: Wash with soap and water.  
Ingestion: Rinse mouth with water immediately.

5) **Fire fighting measures**

This product is non-flammable as supplied. If involved in fire, use extinguishing media appropriate to the fire concerned.

6) **Accidental release measures**

Spillages can be cleaned up with absorbent material like sand or earth.

7) **Handling and storage**

No special storage conditions, other than to keep away from heat and temperature below freezing.

8) **Exposure controls and personal protection**

Protective gloves recommended for prolonged exposure. Safety goggles recommended if removing by pressure wash.

**9) Physical and chemical properties**

Form: Thick emulsion  
Colour: White  
Odour: Slight almond odour  
Melting Point: < -10 C  
Boiling Point: 101 C  
PH Value: Neutral

**10) Stability and reactivity**

Under normal conditions of storage and use this product will be stable. No hazardous decomposition produced when stored and handled correctly. No hazardous reaction when used as directed.

**11) Toxicological information**

May be irritating to eyes. Prolonged skin contact may lead to irritation. May be harmful if ingested in large quantities. No specific toxicology tests have been carried out on this product.

**12) Ecological information**

All materials are readily biodegradable except the surfactant, which is not readily biodegradable.

**13) Disposal considerations**

Consideration should be given to the level of stripped paint residues present in the effluent as these may require special treatment. Disposal of this product and any by-product should at all times comply with the requirements of any regional authority.

**14) Transport Information**

Land Transport not regulated  
Inland waterway transport – not regulated  
Sea transport – not regulated  
Air transport – not regulated

**15) Regulatory Information**

Labelling none  
Risk classification – none  
Water hazard class – none  
Other – none

**16) Other information**

none

This information is based on our present state of knowledge. It should not therefore be construed as guaranteeing specific properties of the product described or their suitability for a particular application. Changes compared to the previous version are marked before the section number.
